

UB Residence Maintenance Survey

Conducted on: 22 July 2026

Sample of Students: 10

1. What is your current level of study?

10 responses

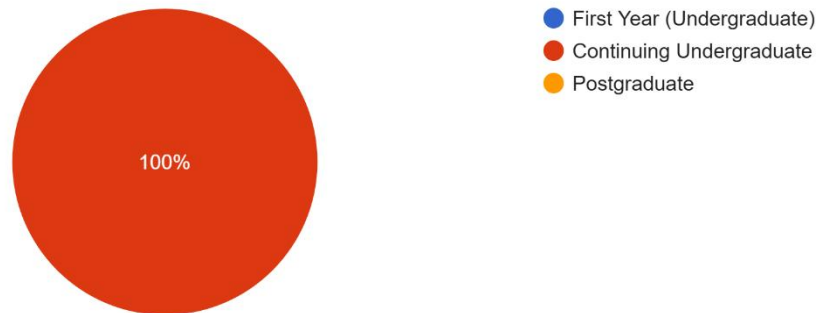

Figure1.0

Figure1.0 shows that 100% of the students who completed the survey were continuing undergraduate students.

2. Which residence block were you assigned to during your most recent sign-in?

10 responses

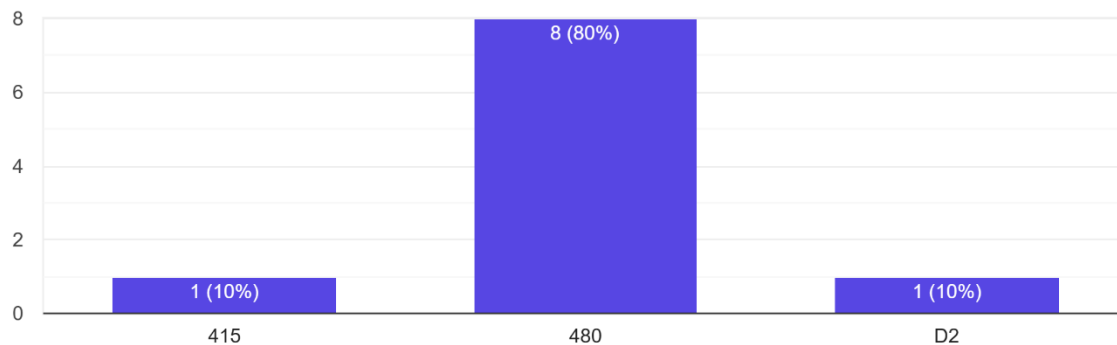

Figure 2.0

Figure 2.0 shows that 80% of the students were allocated block 480, which is the vertical slice for our project.

3. When you signed in, were there any pre-existing maintenance defects in the room?

10 responses

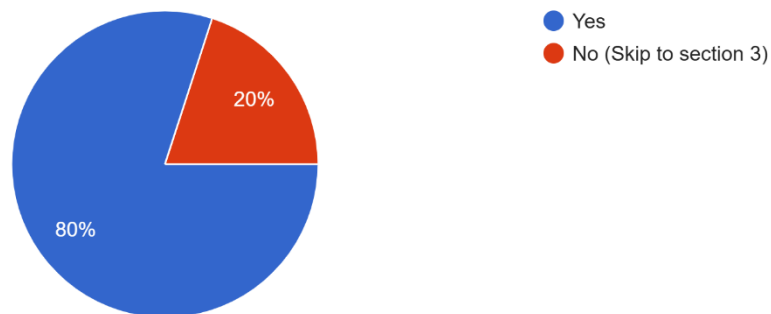

Figure 3.0

Figure 3.0 shows that 80% of the students found their rooms with maintenance faults that needed attention upon moving in.

5. How did you report the maintenance issue(s)?

8 responses

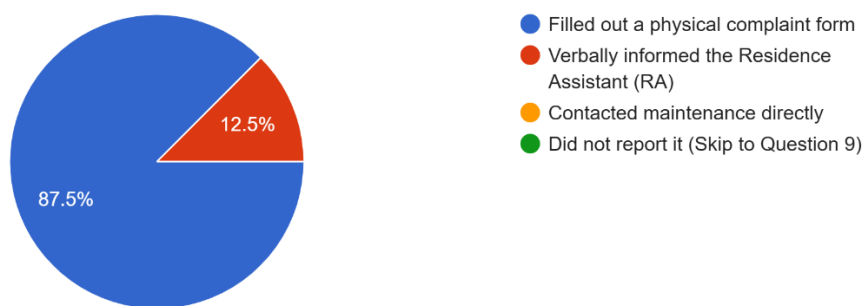

Figure 4.0

Figure 4.0 shows that 87.5% of the students used a paper-based form to log the maintenance call, which is proof that the university solely uses paper-based maintenance complaint process.

7. How were you updated on the progress or status of your maintenance report?

8 responses

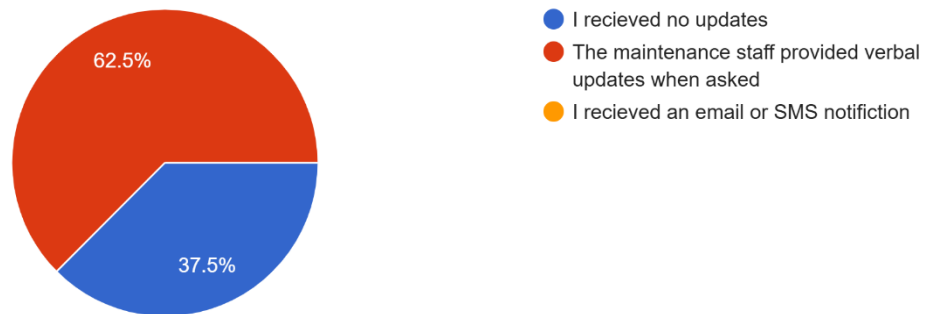

Figure 5.0

Figure 5.0 shows that 62.5% of the students needed to go to the maintenance offices and verbally ask the staff on the status of their complaint tickets, while 37.5% received no updates at all.

8. Did you experience any of the following issues with the paper-based reporting process? (Select all that apply)

8 responses

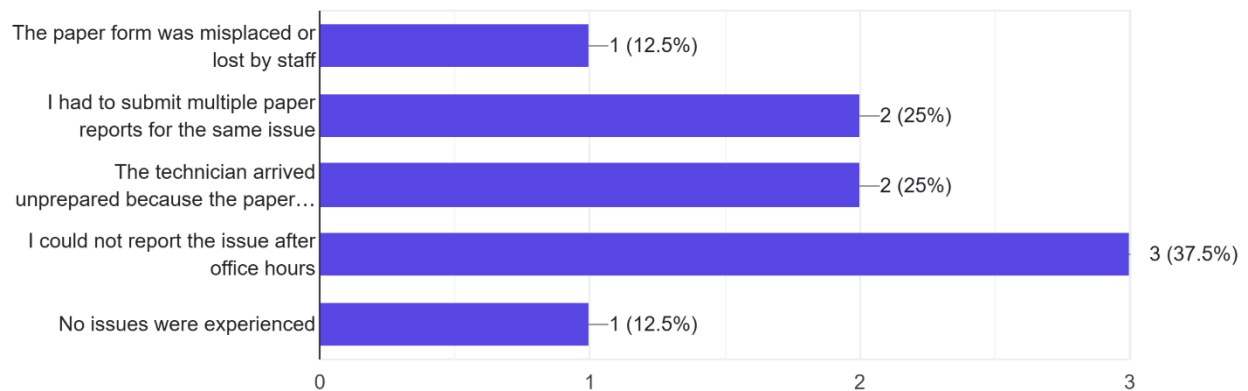

Figure 6.0

Figure 6.0 shows that 12.5% of the students were told that the paper forms are misplaced or lost after they went to verbally ask on the status of their tickets. 25% had to submit

multiple paper reports for the same issue and the technician arrived unprepared because the paper form had not clear explanations of the issue, respectively. 37.5% could not report the issues as they were discovered because it was after office hours, meaning the had to wait for the following day to report.

Figures 7.0 through 9.0 show how much the students agree with the statements mentioned. With 1 = Strongly disagree and 5 = Strongly agree.

Unresolved room faults negatively impacted my academic focus and well-being during moving in
10 responses

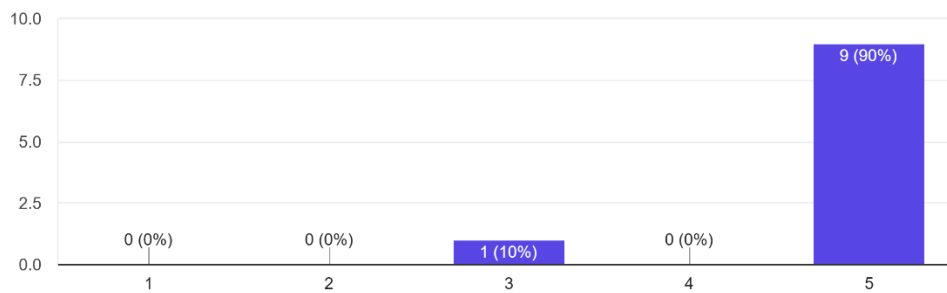

figure 7.0

The current paper-based system is slow, unreliable, and difficult to track
10 responses

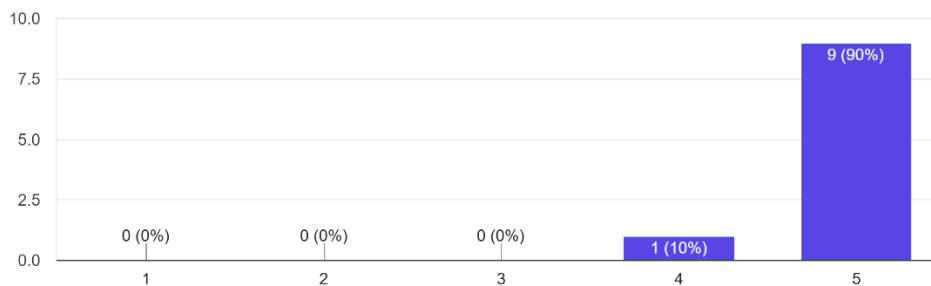

figure 8.0

I would prefer a mobile/digital portal where I can submit room faults and track repair status in real time
